Esrat Jahan Eva

CSE Graduate | Passionate about Technology, Teaching & Research

Dhaka,Bangladesh | +8801910468332 | esratjahan4690@gmail.com | **GitHub**

Career Objective

To establish a successful career by applying my knowledge in Computer Science, strong analytical and communication skills, and passion for continuous learning. I aspire to contribute effectively in both academic and professional environments through innovation, collaboration, and a commitment to excellence.

Education

Jahangirnagar University — September 2026 - Current
Computer Science and Engineering
M.Sc.

Daffodil International University — January 2022 - December 2025
Computer Science and Engineering — CGPA: 3.75
B.Sc.

Jhenaidah Government Girls' High School — GPA: 5.00
SSC

Government KC College, Jhenaidah — GPA: 5.00
HSC

Research Project

Vision-Based Security System: Enforce Campus Security Through ID Card Ribbon Detection

Role: Researcher & Developer

- Install a vision system which tracks ID card ribbons in real time.
- Assign people the roles of student, teacher, and administration (according to the color of ribbon).
- Train YOLOv11s and YOLOv11m with different epoch to find the most accurate model.
- Reduce manual verification and human error.
- Provide a scalable and cost-effective security solution for institutions.
- Successfully presented and defended the project as part of the B.Sc. degree requirements.

Academic Projects

ResQPet – Pet Adoption Management System — **Live Link**

A full-stack web application designed to streamline pet adoption processes with role-based access and real-time data handling.

- Implemented secure role-based authentication using Firebase and JWT for adopters, rescuers, and administrators, ensuring protected access and data integrity.
- Developed complete pet management features (CRUD, image upload, adoption workflows) and integrated advanced search, filtering, pagination, and map-based location visualization.

Technologies used: React.js, Tailwind, Firebase, Express.js, Node.js, MongoDB, TanStack

ExtremePC – Laptop & Desktop E-Commerce Website

A responsive e-commerce platform for browsing and purchasing computer hardware with structured product information.

- Built a responsive multi-page interface using HTML, CSS, and JavaScript, ensuring seamless cross-device compatibility.
- Developed a complete product listing system with specifications, pricing, add-to-cart functionality, and integrated tech guides and reviews for improved user decision-making. **Technologies used:** HTML, CSS, and JavaScript

Hotel Management System

A console-based application focused on efficient room and service management using data structures.

- Implemented a dynamic room management system using linked lists, supporting add, update, delete, and search operations efficiently.
- Developed a structured menu-driven interface and optimized data handling for smooth navigation and effective room allocation.

Academic & Professional Skills

- Teaching and Mentoring
- Communication Skills
- Presentation Skills
- Academic Writing
- Leadership and Teamwork
- Problem Solving and Analytical Thinking
- Time Management
- Continuous Learning

Technical Skills

- **Frontend:** Tailwind, Bootstrap, Javascript, React, PHP.
- **Backend:** Node.js, Express.js, MongoDB, MySQL.
- **Tools:** Git, Github.
- **Language:** Basic of C, Java, Python, Machine Learning, Flutter.
- **Soft Skills:** People Management, Excellent communication, Team work , Leadership.

Research Interests

- Artificial Intelligence
- Computer Vision
- Image Processing
- Software Engineering
- Educational Technology
- Web Technologies
- Human-Computer Interaction

Extra-Curricular Activities

- Participated in academic seminars and workshops.
- Engaged in team-based academic projects and presentations.
- Participated in collaborative learning and knowledge-sharing activities.
- Interested in student mentoring and academic development.
